CRIMINAL LAW—The Road Not Taken: Parameters of the Speedy Trial Right and How Due Process Can Limit Prosecutorial Delay; *Humphrey v. State*, 185 P.3d 1236 (Wyo. 2008).

INTRODUCTION

The murder of Jack Humphrey occurred early morning on November 22, 1977.¹ The events surrounding his death led police to identify his wife, Rita Humphrey, as the prime suspect.² The State of Wyoming subsequently indicted Humphrey for first-degree murder on April 11, 1980.³ Incriminating evidence included an adulterous affair between Humphrey and Ron Akers, which continued soon after the death of Jack Humphrey.⁴ Overdue bills, bad checks, and unaccounted-for withdrawals additionally strained the Humphreys' relationship.⁵ Police found Humphrey's custom-made rifle and a shell casing in the snow outside her home where the victim was shot.⁶ This discovery, along with a gunshot-residue analysis revealing gunpowder on her left hand, implicated Humphrey.⁷ The victim's sister, Bonnie Humphrey, approached Humphrey at the police station the morning of the murder, and Humphrey allegedly hid her face and cried: "God, what have I done?"⁸

Following an April 11, 1980 indictment, Humphrey applied for a preliminary hearing and waived her right to a speedy trial by agreeing to a hearing date of June 23, 1980.⁹ Despite the affair, gunpowder residue, and other suggestive evidence, the preliminary hearing resulted in the dismissal of the murder charges due to lack of probable cause.¹⁰ Twenty-four years later, the State recharged Humphrey for first-degree murder on March 5, 2004.¹¹ Humphrey contended the victim's

sister, the newly elected mayor of Evansville, Wyoming, abused her appointment by compelling police to reopen Humphrey's case and press charges.¹²

In response to the twenty-four year delay preceding these renewed charges, Humphrey challenged her indictment on the grounds of a constitutional, speedy trial violation.¹³ She argued a prejudiced defense, and the Natrona County District Court agreed with this claim.¹⁴ The district court found that the twenty-four year delay between indictments led to the unavailability of evidence, which significantly damaged Humphrey's defense and required case dismissal.¹⁵ Missing evidence included the attorney files used in Humphrey's original defense and the records from the 1980 preliminary hearing.¹⁶ Humphrey valued this evidence since her defense at the 1980 hearing resulted in dismissal of her case.¹⁷

However, the State appealed and the Wyoming Supreme Court held that the district court misapplied the speedy trial analysis, and remanded the case for a new trial.¹⁸ At trial, Humphrey continued to assert her procedural rights to a speedy trial and due process, but the district court overruled these objections.¹⁹ Ultimately, a jury convicted Humphrey of second-degree murder.²⁰ For a second time this case received appellate review.²¹ The Wyoming Supreme Court, in *Humphrey II*, declined to find either a speedy trial or due process violation and affirmed Humphrey's conviction.²²

This case note discusses the scope of one's speedy trial right and its relationship to the law of pre-charge delay.²³ The right to a speedy trial and due process both serve as procedural safeguards, but they address different aspects of the criminal process which, as the case history shows, can confuse practitioners.²⁴ Beyond

clarifying when the speedy trial right activates, this note seeks to explain the potential of due process as a guard against harmful delays in criminal prosecutions.²⁵

BACKGROUND

Humphrey challenged the renewed murder charge against her on constitutional grounds.²⁶ Declining to hold the delays in *Humphrey II* as constitutional violations, the Wyoming Supreme Court applied principles and law promulgated by a line of United States Supreme Court cases.²⁷ Consequently, an examination of these United States Supreme Court cases explains the progression of speedy trial and due process law, and illuminates the court's analysis of *Humphrey II*.²⁸ The Speedy Trial Clause and Due Process Clause provide distinguishable protections against prosecutorial delay.²⁹ Therefore, this section will explain the parameters of the Speedy Trial Clause, and then discuss how due process limits prosecutorial delay.³⁰

The Right to a Speedy Trial

The Sixth Amendment to the United States Constitution guarantees the right to a speedy trial, which is considered one of our most basic rights.³¹ Wyoming's Constitution and Code of Criminal Procedure contain similar guarantees.³² In Wyoming, a defendant can challenge pre-trial delay either by demonstrating the State's failure to adhere to Wyoming Rule of Criminal Procedure § 48(b), or by alleging deprivation of the constitutional right to a speedy trial.³³ This section will focus on the application of the constitutional objection to a speedy trial violation.³⁴

Despite the early existence of the speedy trial right in American law, the scope of this constitutional right lacked a full assessment until the United States Supreme Court heard *Barker v. Wingo* in 1972.³⁵ This case involved the murder of an elderly couple, and the prosecutor suspected a man named Willie Barker.³⁶ To bolster its case, the State repeatedly postponed trial in order to extract incriminating testimony from Barker's accomplice, pushing the trial back almost five years.³⁷ After spending ten months in prison, Barker posted bond and remained free until his trial, at which time the jury convicted him of murder.³⁸

In response to Barker's contention that the government denied him a speedy trial, the United States Supreme Court created a test to define the concept of "speedy."³⁹ The Court acknowledged the myriad of interests involved when bringing an accused to trial.⁴⁰ One such interest involves the impact to an accused's defense resulting from a delay between arrest and trial.⁴¹ Moreover, this type of delay can negatively affect a criminal's rehabilitation, especially when a defendant remains incarcerated.⁴²

In addition, Barker's ability to post bond and spend most of his accused life in the community exemplifies how delay provides a criminal with the chance to do more harm.⁴³ Long delays may also entice accused individuals to "jump bail," and when unable to post bond, the problem of overcrowded jails arises.⁴⁴ Overpopulation in prisons can lead to rioting, and longer jail terms increase the overall price of detaining an individual.⁴⁵ In addition, a swift and fair proceeding also furthers society's interest in bringing an accused to trial.⁴⁶ A congested docket allows defendants to offer guilty pleas in exchange for lesser offenses, which does not comport with society's retributive values.⁴⁷

Based on these legitimate concerns, the United States Supreme Court in *Barker* held a prosecutor has an affirmative duty to bring an accused to trial, and to do so in a manner that upholds due process.⁴⁸ Ultimately, the Court held the best way to ensure due process was to balance four factors: the length of delay, reasons for such delay, whether the defendant asserted his or her right to a speedy trial, and the level of prejudice affecting the defendant.⁴⁹ Adopting a multi-faceted test allows courts to carefully assign a value to each factor based on the circumstances, in relation to the others, as no one factor is dispositive.⁵⁰ The virtue of carefully considering all parties' interests led the majority of courts nationwide to accept and apply *Barker's* factor test.⁵¹

Factor One: The Length of Delay

The first factor relates to the promptness of bringing a defendant to trial, but also serves as a threshold question, necessary to answer before a court must engage in a full speedy trial analysis.⁵² If a defendant can point to a lengthy delay, the circumstances will imply prejudice to the defendant and warrant further inquiry into the harms of the delay.⁵³ Furthermore, this factor establishes the time frame during which prejudice can result.⁵⁴ A court will more likely find a speedy trial violation if the pre-trial delay is significant, because ongoing delays intensify the degree of prejudice presumed to harm a defendant.⁵⁵ Therefore, when the speedy trial clock begins has significant implications for the total analysis.⁵⁶

⁵⁶ *See supra* notes 53–55 and accompanying text for a discussion of how the length of delay affects the total analysis.

The United States Supreme Court in *United States v. Marion* sought to clarify when one's speedy trial right activates.⁵⁷ The *Marion* Court noted the historic policies for constitutionally protecting an accused's speedy trial interest: long, oppressive confinement without explanation; the degree of personal anxiety accompanied by such incarceration; and the notion that an accused will lose the ability to adequately establish a defense while in prison.⁵⁸ The Court held that lengthy incarceration, corresponding anxiety, and prejudice to one's defense were interests implicated only *after* arrest or the filing of formal charges.⁵⁹ Therefore, only the formal charging or arrest of an accused triggers the speedy trial right.⁶⁰

A decade later, the United States Supreme Court heard another significant case and further explained the scope of the speedy trial right.⁶¹ The Court in *United States v. MacDonald* held delay between the dismissal of charges and re-indictment should be assessed under the Due Process Clause, not the speedy trial right.⁶² The *MacDonald* Court justified this holding based on the same policies used to justify why the speedy trial right did not protect against pre-charge delay.⁶³ Despite prior accusation, a person is no longer subjected to the same restrictions on liberty as someone formally charged or under arrest.⁶⁴ The United States Supreme Court later expanded this holding when it declared that appearing for evidentiary hearings and hiring counsel were also not events that triggered the speedy trial clock.⁶⁵

⁵⁹ *Id.* Certainly, prejudice to an accused's defense can occur before arrest or the filing of public charges, especially when a defendant remains unaware of the pending investigation against him or her. See *Doggett*, 505 U.S. at 654–58. The *Marion* Court held, however, that the Speedy Trial Clause is not meant to completely shield a defendant from prejudice. *Marion*, 404 U.S. at 319. The *Marion* Court stated:

[T]he major evils protected against by the speedy trial guarantee exist quite apart from actual or possible prejudice to an accused's defense. . . . Arrest is a public act that may seriously interfere with the defendant's liberty, whether he is free on bail or not, and that may disrupt his employment, drain his financial resources, curtail his associations, subject him to public obloquy, and create anxiety in him, his family and his friends.

Factor Two: The Reason for the Delay

The United States Supreme Court in *Barker* discussed how courts should analyze the reasons for delay.⁶⁶ Valid reasons for delay, such as the unavailability of an ill witness, should not affect the analysis, while intentional procrastination should weigh heavily against the misbehaving party.⁶⁷ Negligence also tips the scale against the responsible party, although not as much as intentional conduct.⁶⁸ Even overcrowded dockets must slightly weigh against the prosecution since it has an affirmative duty to try suspects in a manner that affords due process.⁶⁹ The United States Supreme Court also determined how delays attributable to interlocutory appeals should be factored in the analysis.⁷⁰

Factor Three: The Defendant's Assertion of the Speedy Trial Right

Speedy trial delays can benefit a defendant when memories fade and evidence disappears.⁷¹ The State has the burden of proof, thus, it may be in the defendant's best interest not to insist on a speedy trial and hope the prosecution fails to establish guilt.⁷² A defendant's failure to object to delays in the judicial process will not amount to a waiver of the speedy trial right.⁷³ The United States Supreme Court in *Barker* charged courts to apply discretion and assign weight to a defendant's actions based on the defendant's intentions, the effectiveness of his or her counsel, and the frequency and force of any objections made.⁷⁴ As a general rule, courts must balance affirmative requests for a speedy trial in favor of the claimant; such requests evidence that delays were harmful.⁷⁵

Factor Four: Prejudice to the Defendant

The Court in *Barker* listed three interests of a defendant worthy of constitutional protection.⁷⁶ The aims of the speedy trial clause are to (1) minimize

⁷⁵ *Loud Hawk*, 474 U.S. at 314; *Barker*, 407 U.S. at 531–32. The *Loud Hawk* Court warned, however, that a superficial demand for a speedy trial will not count as behavior evidencing an accused's deprivation of the right. *Loud Hawk*, 474 U.S. at 314.

⁷⁶ *Barker*, 407 U.S. at 532 (citations omitted).

an accused's jail-time preceding trial, thereby (2) reducing unnecessary anxiety and (3) the risk of losing evidentiary support for a defendant's case.⁷⁷ The *Barker* Court considered these three interests as sub-factors to the general concern of prejudice to a defendant.⁷⁸ In addition, *Barker* viewed the third sub-factor, prejudice to one's defense, as the most significant when determining the existence of a speedy trial violation.⁷⁹

This assertion contradicted what the Court stated a year earlier in *United States v. Marion* about the primary role of the speedy trial clause.⁸⁰ Twice since *Marion*, the United States Supreme Court suggested that preventing prejudice to one's defense was a secondary concern in a speedy trial analysis.⁸¹ However, in *Doggett v. United States* the Court eventually returned to its position in *Barker*, holding prejudice as the most important, protectable interest.⁸² The Wyoming Supreme Court also considers the impairment of one's defense as the most damaging form of prejudice caused by pre-trial delay.⁸³

A court's valuation of factor four, prejudice to one's defense, depends on what an accused can prove at trial.⁸⁴ *Doggett*, the most recent United States Supreme Court case discussing this issue, acknowledged that prejudice can exist despite what is specifically demonstrable, and the inability to show actual prejudice does not preclude a court from finding a speedy trial violation.⁸⁵ The Court, relying on its commentary in *Barker*, recognized the inherent difficulty in proving actual harm to one's defense caused by the passage of time.⁸⁶ In response, the Court

⁸⁴ See *Fortner v. State*, 843 P.2d 1139, 1146 (Wyo. 1992) (“Although [Defendant] has shown a delay which could be prejudicial and did assert his right to speedy trial, he has not . . . demonstrated actual prejudice from the delay.”); see *Loud Hawk*, 474 U.S. at 314 (affirming the lower court's decision to give only “little weight” to the fourth factor since the defendant could only point to the possibility of prejudice).

⁸⁵ *Doggett*, 505 U.S. at 655.

⁸⁶ *Id.* (“[I]mpairment to one's defense is the most difficult form of . . . prejudice to prove because time's erosion of exculpatory evidence and testimony ‘can rarely be shown.’” (quoting *Barker*, 407 U.S. at 532)). The Court added that the likelihood of prejudice is directly proportional to length of pre-trial delay. *Id.* at 651–52.

suggested that as delay intensifies, the burden of demonstrating actual prejudice begins to shift from the defendant to the State.⁸⁷

Many courts have adopted *Doggett's* method of analyzing prejudice.⁸⁸ However, the unique and lengthy pre-trial delay in *Doggett* left courts with only an outer limit as to when a delay requires the prosecution to rebut a presumption of prejudice.⁸⁹ In *Doggett*, more than eight years passed between formal indictment and *Doggett's* trial, compelling the Court to charge the prosecution with rebutting a presumption of prejudice against the defendant.⁹⁰ A similar delay would require state courts to apply this burden-shifting procedure; however, *Doggett* did not explain whether a presumption of prejudice could arise before an eight-year delay.⁹¹ Wyoming courts have yet to encounter a case of excessive pre-trial delay warranting the presumption that a defendant's case suffered from prejudice.⁹²

In summation, the line of United States Supreme Court cases emerging from *Barker* and *Marion* highlight the many interests implicated by delays in bringing

⁸⁷ See *id.* at 657–58 n.4 (admitting *Doggett* failed to specify any prejudice from the eight-and-a-half year delay between indictment and trial, but finding for him because the State did not persuasively rebut his allegations by showing how the defendant was unharmed by the delay).

⁸⁸ E.g., *State v. Ariegwe*, 167 P.3d 815, 835 (Mont. 2007) (“[A s]howing by the accused of particularized prejudice decreases, and the necessary showing by the State of no prejudice correspondingly increases, with the length of the delay.”); see *Heiser v. Ryan*, 15 F.3d 299, 304 (3rd Cir. 1994) (affirming the lower court's decision to apply the *Doggett* presumption, but finding the State successfully rebutted the presumption of prejudice); *United States v. Aguirre*, 994 F.2d 1454, 1457 (9th Cir. 1993) (“Five years delay attributable to the government's mishandling of [Defendant's] file, like the eight year delay in *Doggett*, creates a strong presumption of prejudice . . . the government [has not] ‘persuasively rebutted’ the presumption of prejudice.” (citations omitted)); *State v. Williams*, 698 N.E.2d 453, 454–55 (Ohio App. 2 Dist. 1997) (finding a five-year delay caused by prosecutorial negligence required the State to rebut a presumption of prejudice).

⁸⁹ E.g., *Pelletier v. Warden*, 627 A.2d 1363, 1371 n.12 (distinguishing *Doggett* based on its unique facts and significant delay); *Goodrum v. Quarterman*, No. 06-20980, 2008 WL 4648459, at *7 (5th Cir. Oct. 22, 2008) (“Additionally, the 2 1/2 year length of delay in this case falls well short of the 6 years attributed to official negligence in *Doggett* and which warranted a presumption of prejudice in that case.”) (citations omitted); *Jackson v. Ray*, 390 F.3d 1254, 1264 (10th Cir. 2004) (“[B]ecause the delay is less than six years, clearly established Supreme Court law does not require application of the *Doggett* rule.”).

⁹⁰ *Doggett*, 505 U.S. at 658. The government was responsible for six years of the delay. *Id.*

⁹¹ Compare *id.* (finding a presumption of prejudice from a six-year delay due to prosecutorial negligence), with *Aguirre*, 994 F.2d at 1457 (noting a greater delay in *Doggett* but requiring the government to rebut a presumption of prejudice after five years), and *United States v. Bergfeld*, 280 F.3d 486, 491 (5th Cir. 2002) (finding presumed prejudice after a five-year delay caused by the government).

⁹² *Humphrey II*, 185 P.3d at 1246 (holding until the length of delay gives rise to a probability of substantial prejudice, the defendant retains the burden of proving prejudice). In Wyoming, a 561-day delay does not create a probability of substantial prejudice. *Id.*; *Standlien*, 156 P.3d at 991 (finding a delay of 762 days does not lead to a presumption of prejudice); *Warner*, 28 P.3d at 27 (holding delay of 658 days does not presumptively prejudice); *Whitney*, 99 P.3d at 475 (holding a 374 day delay is not presumptively prejudicial).

defendants to trial.⁹³ To harmonize zealous prosecutions with the mandates of the Sixth Amendment, a four-factor test was devised.⁹⁴ Consequently, this test and all its nuances serve as the backbone of Wyoming's speedy trial law.⁹⁵

The Fundamental Right to Due Process Bars Excessive Delay in Formally Charging or Arresting an Accused

Although the speedy trial right seeks to prevent harm from delays in the judicial process, it cannot operate until the prosecution arrests or formally charges an accused.⁹⁶ Thus, the Speedy Trial Clause does not account for pre-charge or pre-arrest delays in prosecution; however, other protections exist to accomplish this goal.⁹⁷ The United States Supreme Court in *Marion* asserted that applicable statutes of limitations serve this function, along with the Due Process Clause of the Fifth Amendment.⁹⁸ The Due Process Clause, in pertinent part, indicates no person shall be "deprived of life, liberty, or property, without due process of law," and the Fourteenth Amendment of the Constitution compels states to ensure this same guarantee.⁹⁹ Consequently, Wyoming's pre-charge law reflects the principles and guidelines set forth in *Marion*.¹⁰⁰ Understanding Wyoming's pre-charge law requires an examination of the United States Supreme Court's approach to this issue.¹⁰¹

The Court in *Marion* reiterated the maxim that due process signifies a fair trial.¹⁰² An ambiguous term itself, the *Marion* Court did not say when a fair trial exists, but recognized that a fair trial does not exist when the prosecution

(1) intentionally delays arrest or formal accusation of a defendant, and (2) such delay was so extensive that it caused substantial prejudice to the accused's defense.¹⁰³ Thus, scrutinizing prosecutorial delay became a fact specific analysis.¹⁰⁴

Two main factors illustrate why the *Marion* Court set the base level of protection at a showing of intentional misconduct by the state and actual prejudice to one's defense.¹⁰⁵ First, the defendant alleged a violation of due process, notwithstanding an unexpired statute of limitation.¹⁰⁶ *Marion* considered statutes of limitations as "the primary guarantee" against attempted prosecution long after the commission of a crime.¹⁰⁷ By these legislative enactments, society acknowledges that a defendant will be deprived of a fair trial at some point.¹⁰⁸ Thus, as secondary protection against delay, the *Marion* Court required defendants to prove glaring injustice before finding a due process violation.¹⁰⁹

Second, *Marion* valued prosecutorial discretion in choosing when to seek convictions.¹¹⁰ The Court found it irrational to charge criminals immediately when investigators could establish probable cause.¹¹¹ In *United States v. Lovasco*, the United States Supreme Court held when pre-charge delay violates "fundamental conceptions of justice" and "the community's sense of fair play," a court must order dismissal of the case.¹¹²

The community's sense of fair play embraces prosecutorial discretion regarding when to charge and arrest suspects.¹¹³ Expecting the state to prosecute as soon as legal, probable cause exists may lead to the dismissal of unripe, but worthy cases.¹¹⁴ Convincing a jury of a defendant's guilt, at trial, requires more than probable cause.¹¹⁵ Faced with the possibility of dismissals, prosecutors would imprison or

charge defendants earlier than necessary, and before fully developing its case.¹¹⁶ In turn, the prosecutor would be racing against the speedy trial clock and the accused would face longer periods of anxiety, unemployment, and diminished social relations.¹¹⁷ Reality proves that cases often involve multiple actors and various crimes, and simply require more time to develop than what is necessary to arrest or charge a suspect.¹¹⁸ Thus, a prosecutor must have freedom to decide when it should seek convictions.¹¹⁹

Courts have recognized the difficulties inherent in meeting the requirements of this *Marion* test.¹²⁰ In particular, showing prosecutorial misconduct poses a significant hurdle since the prosecution usually controls the information essential to prove this element.¹²¹ In response, the Wyoming Supreme Court decided to adopt a more balanced test but retained the defendant's burden of proving each element: if the defendant can make a prima facie showing of intentional misconduct, the State must submit its reasons for delaying prosecution.¹²² To prevail, the State need only rebut the assertion that the delay resulted from bad faith.¹²³

The Wyoming Supreme Court also explained its method of evaluating actual prejudice.¹²⁴ If a defendant no longer has access to evidence, and the defendant can prove that the use of such evidence would have altered the outcome of the

trial, a court will find such circumstances amount to actual prejudice.¹²⁵ The defendant must convey the value of missing evidence or witnesses by emphasizing the exculpatory propensity of such evidence.¹²⁶ Again, the reasonable probability of actual prejudice will persuade a Wyoming court to dismiss charges, not possible prejudice.¹²⁷

In summary, the United States Supreme Court decisions in *Barker* and *Marion* laid the foundation for analyzing the speedy trial right, as well as due process violations caused by pre-charge delay.¹²⁸ The Wyoming Supreme Court has structured its law accordingly, and recently confronted a murder case ripe for applying both constitutional principles.¹²⁹

PRINCIPAL CASE

Humphrey accused the State of violating her right to a speedy trial and denying her due process when prosecutors reinstated murder charges against her, twenty-four years after the dismissal of her case.¹³⁰ The Wyoming Supreme Court, in a unanimous decision, ruled the State did not violate her constitutional rights.¹³¹ Beginning with the speedy trial analysis, the court first considered whether the prosecution failed to follow Wyoming Rule of Criminal Procedure § 48(b), finding Humphrey waived the time limitations rule and consented to a trial date beyond the 180-day requirement.¹³² Next, the court addressed the speedy trial claim from a constitutional standpoint, applying the *Barker* test.¹³³ Although the State re-charged Humphrey twenty-four years after her initial indictment, the court excluded this time when evaluating the first factor, length of delay.¹³⁴

Accordingly, the delay totaled 561 days, which compelled the court to continue its speedy trial analysis.¹³⁵

The second factor, reasons for the delay, neutrally affected both Humphrey and the State.¹³⁶ The third factor, assertion of the constitutional right, weighed slightly in Humphrey's favor since she asserted her speedy trial right through motions, but acquiesced when the State sought continuances.¹³⁷ In addressing the fourth factor, prejudice to the defendant, the court noted the three evils targeted by the speedy trial clause: lengthy pre-trial incarceration, corresponding anxiety, and prejudice to one's defense.¹³⁸ The court also reiterated that defendants have the burden of proving prejudice until the delay is truly excessive.¹³⁹ The court found the delay of 561 days insufficient to presume prejudice.¹⁴⁰

The court then addressed Humphrey's claim of actual prejudice in connection with the fourth factor, prejudice to the defendant.¹⁴¹ Humphrey argued the twenty-four years between her 1980 and 2004 indictments severely hampered her defense, resulting in unavailable documents and witnesses.¹⁴² The court acknowledged that this twenty-four year delay subjected Humphrey to significant prejudice.¹⁴³ The twenty-four year delay, however, did not fall within the ambit of the Speedy Trial Clause.¹⁴⁴ The clause did account for the 561-day delay preceding Humphrey's 2006 trial, but this delay was not responsible for the lost evidence.¹⁴⁵ Accordingly,

this factor did not weigh in favor of Humphrey, and the court ultimately ruled that a comparison of all four *Barker* factors did not justify the dismissal of her charge on the basis of a speedy trial violation.¹⁴⁶

The Wyoming Supreme Court also analyzed whether re-charging the defendant for the murder, twenty-four years after the dismissal of her 1980 indictment, amounted to a violation of due process.¹⁴⁷ The court outlined the elements necessary to prove such a violation: actual prejudice to the defendant and intentional delay by the State to gain a tactical advantage.¹⁴⁸ First, regarding actual prejudice, the court found Humphrey's claims of missing evidence and unavailable witnesses did not support a finding of actual prejudice.¹⁴⁹

The defendant argued that files used to establish her prior defense in 1980 had unique exculpatory value since her prior efforts convinced the district court to dismiss the charges for lack of probable cause.¹⁵⁰ However, the Wyoming Supreme Court accorded little value to this argument because Humphrey could not point to specific evidence in those documents that could alter the outcome of her current trial.¹⁵¹ Next, the defendant pointed to missing tape-recordings and transcripts of the 1980 preliminary hearing, which may have contained persuasive arguments for Humphrey's case and functioned to impeach the State's key witnesses.¹⁵² The court ruled Humphrey did not specifically explain how these items would help her defense, and thus found they were not demonstrative of a prejudiced defense.¹⁵³

Additionally, Humphrey claimed the missing financial records of her 1977 bank account would prove that she and her former husband did not have monetary problems.¹⁵⁴ Humphrey argued these documents would effectively refute the prosecution's argument that financial instability caused tension between Jack and Rita Humphrey and motivated her to kill Mr. Humphrey.¹⁵⁵ The Wyoming Supreme Court also found this speculative and not representative of actual prejudice.¹⁵⁶ The court reiterated that mere passage of time will not emancipate

an accused and that the legislature excluded statutes of limitations to prevent such an event.¹⁵⁷ Rather, a defendant must prove actual prejudice.¹⁵⁸ Ultimately, the court in *Humphrey II* had no basis on which to dismiss Humphrey's case due to actual prejudice to the defendant.¹⁵⁹

Regarding the second element of the due process violation claim, intentional delay by the state, the Wyoming Supreme Court found that Humphrey's allegations did not satisfy the requisite prima facie showing of prosecutorial misconduct.¹⁶⁰ Humphrey accused the victim's sister, Bonnie Humphrey, of using her status as mayor to hire a police chief who would reopen Humphrey's case.¹⁶¹ The court explained that aside from Bonnie Humphrey's motive, Humphrey could not prove the prosecutors, themselves, intentionally delayed pressing charges.¹⁶² Nonetheless, Humphrey urged the court to require the State to explain the reasons for postponing accusation.¹⁶³ The court declined to uproot its law, and ruled that Humphrey failed to meet her burden for this element.¹⁶⁴

In deciding how to assess the twenty-four years preceding Humphrey's renewed charges, the Wyoming Supreme Court analyzed the speedy trial right and due process right using its established law.¹⁶⁵ The court held the twenty-four years did not fall within the ambits of speedy trial protection.¹⁶⁶ Turning to the protection of due process, the court did not find that the State deprived Humphrey of a fair trial.¹⁶⁷ Although the Natrona County District Court believed the delay left Humphrey prejudiced, the Wyoming Supreme Court did not find actual prejudice.¹⁶⁸ The court also held that Humphrey failed to make a prima facie case of prosecutorial bad faith.¹⁶⁹ The outcome of the principal case evidences the patent difficulties in proving the requisite elements of a due process violation.¹⁷⁰

ANALYSIS

Although the United States and Wyoming constitutions guarantee the quality of criminal adjudicative processes, the Wyoming Supreme Court's decision in *Humphrey II* suggests an accused charged with a crime in Wyoming may not, pragmatically, be protected by these documents.¹⁷¹ By striving to convince the Wyoming Supreme Court to consider the time between her indictments in its speedy trial analysis, Humphrey actually sought the more probable avenue to protecting her right to a fair trial.¹⁷² The difficult burden of proving a due process violation in Wyoming implies the State's pre-charge law needs reconfiguration.¹⁷³

The Pre-charge Law Established in Marion Must Be Tailored to Adequately Guard Against the Prosecution of Overly Stale Criminal Charges

To begin, revisiting the context of Wyoming's adopted due process law will illuminate the core problems in the State's current law.¹⁷⁴ In *Marion*, the appellees, as in *Humphrey II*, sought to apply their speedy trial right to pre-accusation delay.¹⁷⁵ The Court acknowledged the harmful effects of pre-charge delay and unjust criminal proceedings.¹⁷⁶ However, the speedy trial protection does not activate until the prosecution publicly charges or arrests an accused.¹⁷⁷ Nonetheless, policy dictates that prejudice must always remain a factor when reviewing criminal procedure to insure the reliability of the system.¹⁷⁸ Thus, the Court held that due

process would address concerns of lengthy pre-charge delay that prejudice one's defense.¹⁷⁹

To require proof of intentional misconduct and actual prejudice, however, demands much from a challenging defendant.¹⁸⁰ For one, a defendant cannot usually obtain the evidence illustrating the reasons for the pre-charge delay.¹⁸¹ Without access to such information, an accused may have difficulty even building a *prima facie* case of intentional misconduct.¹⁸² Second, only in rare instances can a defendant actually show to what extent the passage of time caused prejudice.¹⁸³ The exculpatory value of missing evidence will usually appear speculative, even when such evidence would effectively undermine a prosecutor's case.¹⁸⁴ In lieu of a more balanced test, however, the United States Supreme Court set these one-sided, stringent requirements in response to existing statutes of limitations.¹⁸⁵

The United States Supreme Court in *Marion* analyzed due process *in conjunction* with an unexpired statute of limitation, and stated generally that such legislation served as the primary means of barring stale prosecutions.¹⁸⁶ *Marion*

acknowledged that prejudice to an accused's defense will eventually arise in a way a defendant cannot actually demonstrate at trial.¹⁸⁷ Fairness to the defendant, the integrity of the judicial process, and the difficulty of proving substantial prejudice caused by pre-charge delay motivate legislatures to enact statutes of limitations.¹⁸⁸ Such statutes preemptively account for defendants' interests in receiving a fair trial.¹⁸⁹ Due process is a secondary protection in the area of pre-charge delay.¹⁹⁰ Thus, *Marion* required more from a defendant who sought to prove the criminal process failed to administer substantial justice, despite an applicable statute of limitations.¹⁹¹ A major problem arises, however, when a jurisdiction lacks this primary guarantee against prejudicial delay in prosecution.¹⁹²

Only two states, including Wyoming, do not have statutes of limitations for any criminal offense.¹⁹³ Social mores change and justify the decision against enacting statutes of limitations.¹⁹⁴ This case note does not seek to criticize the Wyoming legislature for declining to promulgate such statutes, nor does it advocate for their adoption.¹⁹⁵ Wyoming courts must acknowledge, however, that the United States Supreme Court's due process analysis complemented statutes of limitations.¹⁹⁶ Without legislation limiting pre-charge delay, the Due Process Clause becomes the sole means of shielding an accused from prejudicial delay.¹⁹⁷

Maintaining the basal requirements for proving due process violations, set out in *Marion*, inadequately accounts for a defendant's interests when alternate means of protection do not exist.¹⁹⁸ The Wyoming Supreme Court has even quoted *Marion*, saying that *in consideration of* an applicable statute of limitations, the mere possibility of prejudice cannot serve as the basis for proving a denial of due process.¹⁹⁹ The United States Supreme Court noted, however, that this ruling might have been different in the absence of such a limitation period.²⁰⁰

When legislatures do not protect an accused's interest in avoiding unidentifiable prejudice from pre-charge delay, courts must do this; fairness and efficiency must always be central to the judicial process.²⁰¹ Wyoming courts can ensure the integrity of this process by adopting a more balanced due process analysis.²⁰² Many jurisdictions apply a balancing approach, the type the Wyoming Supreme Court rejected in *Fortner v. State*.²⁰³ The basis for this balancing analysis stems from ambiguity in the United States Supreme Court case *United States v. Lovasco*.²⁰⁴

The reasons are then balanced against the defendant's prejudice."); *Howell v. Barker*, 904 F.2d 889, 895 (4th Cir. 1990) (holding that once a defendant makes a showing of actual prejudice, the defendant must submit legitimate reasons for the delay, at which time the reviewing court will weigh the degree of prejudice with the reasons for delay to decide whether the prosecution violated due process); *Fritz v. Although the defendant in *Lovasco* proved actual prejudice, the United States Supreme Court considered the reasons for the delay before dismissing the case.²⁰⁵ The Court held the government justifiably delayed prosecution, which outweighed the prejudice it caused the defendant.²⁰⁶ Since this decision, various United States appellate courts either balance the due process elements as factors (the disjunctive approach), consider each a necessary element for the defendant to prove (conjunctive approach), or have yet to clearly choose an analysis.²⁰⁷ To better account for defendants' rights, jurisdictions without statutes of limitations, like Wyoming, should adopt the disjunctive method of analyzing pre-charge delay, instead of the one-sided conjunctive approach.²⁰⁸

Adding Presumptive Prejudice to the Law of Pre-Charge Delay May Better Ensure Due Process

To completely guarantee due process, without the assistance of statutes of limitations, Wyoming courts should also consider adopting part of the speedy trial analysis: the presumption of prejudice when excessive delays ensue.²⁰⁹ The United States Supreme Court case, *Doggett v. United States*, provides justification for this method.²¹⁰ In that case, the government formally indicted a defendant

Williams*, 738 F.2d 172 (7th Cir. 1984)). A good argument exists that proving unlawful pre-charge delay is too difficult. *See LAFAVE supra* note 207, § 18.5(b). *See also* Goldfarb *supra* note 120, at 666–67, 679–80 (explaining that current pre-charge delay jurisprudence is overly burdensome for a defendant, and courts should adopt more balanced means of testing due process). who the police could not locate.²¹¹ For eight-and-a-half years the accused remained unaware of the indictment and lived freely, under his true name, until the government apprehended him.²¹² While examining the fourth factor of the speedy trial analysis, prejudice to the accused, the Court realized the defendant could only allege one type of prejudice: an injured defense.²¹³ Although Doggett could not specify how the delay hindered his defense, the Court dismissed the case.²¹⁴ In doing so, the Court explained that instances of lengthy delay may require a court to assume prejudice to an accused's defense, since demonstrating actual prejudice could be impossible.²¹⁵

Aside from the technical fact that the government indicted Doggett, the circumstances resembled those in a pre-charge analysis.²¹⁶ It seems reasonable, then, to allow for this presumption in a due process context.²¹⁷ As evidenced in *Doggett*, delay in compelling a defendant to stand trial, regardless of formal charges or arrest, leads to the unavailability of evidence and testimony, and precisely the type of harm pre-charge delay begets.²¹⁸ Again, instances arise when neither a defendant nor a prosecutor can truly demonstrate the effects of missing evidence and faded memories, which suggests that always requiring an accused to show actual prejudice undermines the integrity of the judicial process.²¹⁹

Humphrey II exemplifies the injustice that can result from strictly applying *Marion's* due process analysis without alternate means of guarding against overly stale prosecution.²²⁰ Twenty-four years after a dismissal for lack of *probable cause*, with no indication of newly discovered evidence, the Natrona County District Court weighed the interests of both parties and found the re-prosecution unconstitutional.²²¹ Had the Wyoming Supreme Court fully recognized that

Humphrey's interests were not accounted for by the legislature, and balanced this prejudice against the reasons for delay, Humphrey would have received due process.²²² In addition, the court may have also dismissed Humphrey's case.²²³

In summary, statutes of limitations normally reflect the interests of defendants and society in barring overly stale prosecutions.²²⁴ Due to the absence of such legislation in Wyoming, however, the Supreme Court of Wyoming must remodel its due process analysis to prevent unfair, pre-charge delay.²²⁵ By comparing the prosecution's reasons for the pre-charge delay with the resulting prejudice, defendants will have realistic means of protecting their right to a fair trial.²²⁶ Notably, the only other jurisdiction without any statutes of limitations, South Carolina, employs this balancing method of analysis.²²⁷

CONCLUSION

The district court's dismissal of Humphrey's latest murder charges in 2005 reflected sound reasoning; the twenty-four year period between indictments seemed to irreparably harm Humphrey's defense.²²⁸ In fact, the court did find the pre-indictment delay to substantially prejudice her case.²²⁹ However, the court's

finding did not ultimately favor Humphrey, because the speedy trial right only applies after formal indictment or arrest.²³⁰ As the Wyoming Supreme Court later directed, the district court should have determined the effects of that twenty-four year period under a due process analysis.²³¹ Interestingly, by doing so the outcome of Humphrey's case was drastically altered.²³²

Humphrey's pre-charge situation, viewed through a speedy trial lens, permitted the district court to balance the reasons for delay against the resulting prejudices and dismiss her case.²³³ Unlike the evenhanded speedy trial analysis, proving the lack of due process requires a defendant to prove actual prejudice and prima facie intentional delay by the prosecution.²³⁴ This case highlights how difficult it can be for a defendant to successfully prove a due process violation caused by pre-charge delay, even if circumstances suggest otherwise.²³⁵

In light of Wyoming's reluctance to enact statutes of limitations for any crime, and that the United States Supreme Court established the law of pre-charge delay with such statutes in mind, this case note seeks to encourage the Wyoming Supreme Court to revamp its due process law.²³⁶ The court can properly guarantee a fair trial by adopting a method of evaluating due process that compares reasons for the pre-charge delay to the level of prejudice asserted by the accused.²³⁷ In certain instances, a court should even consider a presumption of prejudice when the delay is truly excessive.²³⁸

"To accommodate the sound administration of justice to the rights of the defendant to a fair trial will necessarily involve a delicate judgment based on the circumstances of each case."²³⁹ In the case of *Humphrey II*, had the Wyoming Supreme Court applied this logic and carefully balanced the interests of both the prosecution and defense, the State would have ensured fair play and justice, displaying the integrity of Wyoming's judicial system.²⁴⁰
